

Free (fun!) workshop

Saturday, August 22

9:30am - 11am

Discovery Garden Park

219 Lawrenceville St NW, Norcross, GA 30071

GREAT GEORGIA

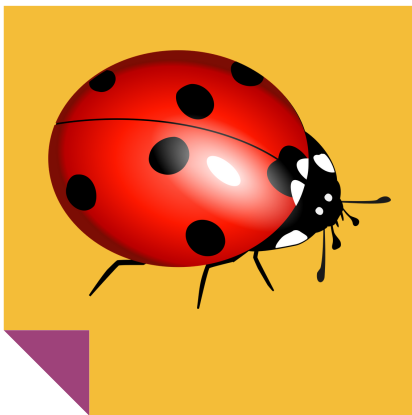

Pollinator Census

For kids who count

Your kids will help scientists from UGA learn more about the insects who pollinate our flowers and food!

All ages welcome! Learn about pollinators and count them on your favorite flowers.

Drop in at your convenience - we'll provide everything you need to count!

GREAT GEORGIA POLLINATOR CENSUS

The Great Georgia Pollinator Census is a statewide project where all Georgia citizens will be asked to count pollinators. Each citizen scientist (YOUR CHILD!) will choose a favorite plant that is blooming in the garden.

We will count all the insects that land on that plant during a 15-minute period. Later, our club members will tally the counts and upload the data to a special University of Georgia webpage. The information will be used for researchers to see a snapshot of which pollinators are at work in Georgia.

No need to be an expert, just be able to count and have fun!

Sponsored by the Norcross Garden Club
Norcross Bee City USA committee
and Gwinnett Soil and Water Conservation District
